

RANGEHOOD COLLECTION

Quiet powerful rangehoods

amorre

Amore Quiet Rangehoods

At the heart of every culture is a simple belief,
Food brings people together.

Whether it's a family dinner, a celebration with friends,
or a quiet meal for two, the kitchen is where love lives.

Amore Quiet Rangehoods are crafted with that spirit in mind.

Beautifully designed to powerfully remove steam and cooking
odours while preserving a peaceful atmosphere. Amore works
quietly in the background so you can focus on what matters most.

Connection. Comfort and Shared moments.

Designed for your lifestyle

Amore offers a carefully curated selection of rangehoods designed to match your lifestyle and design preferences.

Each model features ultra-quiet operation while effectively removing steam, smoke and grease from your kitchen, ensuring a clean, healthy and comfortable environment in your home.

Aunties, Nonnas, Mothers, and Grandchildren dance through the kitchen preparing a family feast, the air hums with life.

The clatter of pans, the rustle of fresh basil, the tender rolling of handmade pasta. Children sneaking bites from the counter. Stories are told, secrets whispered, laughter rises like Nonna's famous ragu simmering on the stove.

Generations gather, hands move with love, shaping every meal into a memory, hearts fill - every kitchen telling its own love story.

Amore Rangehoods – “Quiet enough for whispers. Powerful enough for feasts.”

- That's Amore

German precision motors you'll love

Amore's EX-Drive™ external motors are expertly engineered in Germany to deliver both powerful extraction and quiet performance. Designed to withstand New Zealand's demanding outdoor environments, they come with the assurance of a 10-year warranty. Motors are available in three sizes to suit your cooking needs. Select the option below that best fits your cooking style.

Amore 900

Normal Cooking

- 900 m3/hr airflow
- Energy efficient German made EX-Motor
- The motor housing is crafted from ASA, one of the most durable plastics for direct sunlight exposure
- 200mm flexi ducting (5m), solid roof extension pipe and bell housing adapter included with motor.
- Installation: Roof & Wall
- Warranty - 10 Years
- Product code: AM900

Amore 1600

Heavy Cooking

- 1600 m3/hr airflow
- Energy efficient German made EX-Motor
- Motor housing is powder coated galvanized steel, which can be painted
- 200mm flexi ducting (5m), solid roof extension pipe and bell housing adapter included with motor.
- Installation: Roof & Wall (Wall Mount will need hanging bracket)
- Warranty - 10 Years
- Product code: AM1600

Amore 3200

Extreme Cooking

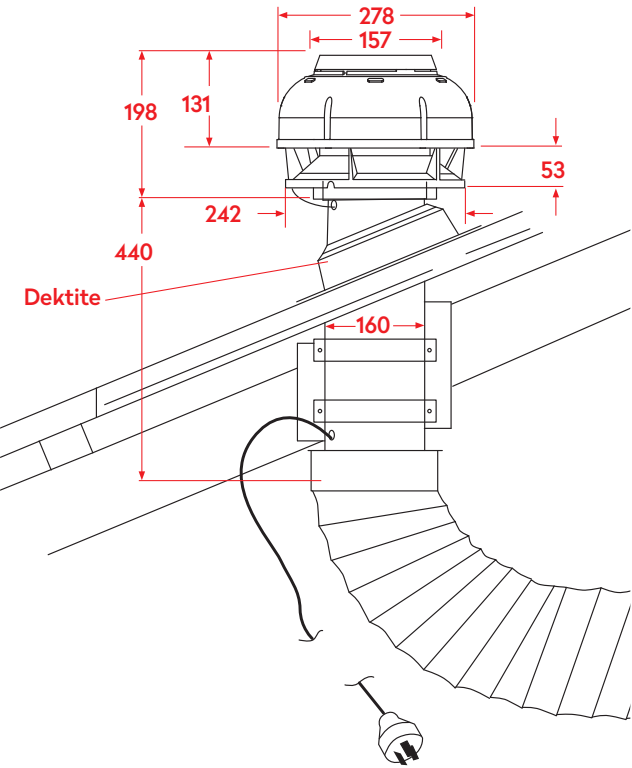

- 3200 m3/hr airflow
- Energy efficient German made EX-Motor
- Motor housing is powder coated galvanized steel, which can be painted
- 250mm flexi ducting (5m), solid roof extension pipe and bell housing adapter included with motor.
- Installation types: Roof
- Warranty - 10 Years
- Product code: AM3200

Things to consider when choosing your Amore Rangehood

What width should my rangehood be?

Where possible, ensure the rangehood is the same or greater width than the cooktop. This will help capture the smoke and steam generated from the cooktop.

Good

Rangehood not wide enough

Better

Rangehood same width as cooktop

Best

Rangehood wider than cooktop

What depth should the overhead cabinet be?

When installing an undermount rangehood into overhead cabinetry it is important to consider the depth of the cabinet and the position of the rangehood in the cabinet.

The wider the overhead cabinetry, the better the hood can capture the smoke and steam created by the cook top.

Also important is to position the hood towards the front of the cabinet, which will create a better suction area for the smoke and steam to be captured by the hood.

What is the recommended height between cooktop and rangehood?

It is important to make sure your rangehood is between the minimum and maximum heights from the cooktop.

The maximum height guarantees the rangehood can capture all the smoke and steam generated at the cooktop.

The minimum height makes sure that heat from the cooktop is safe to enter the rangehood.

800mm

Maximum height of rangehood above cooktop

650mm

Minimum height of rangehood above cooktop

10 Reasons to Choose an Amore Rangehood

Do any of these resonate?

Here are 10 Red Flags that tell you your Rangehood isn't cutting it.

1. Grease Test

Does the top of your fridge pass the grease test? Glide your fingers across the top of your fridge. If you get sticky fingers, it's likely a buildup of grease, fats and oils from cooking that your rangehood hasn't extracted.

2. Lingering Smells

Have you ever visited a house where the aroma of yesterday's cooking still lingers in the air?

3. Noise Levels

Have you ever switched on a rangehood and it sounded like a jet engine?

4. Air Quality

Could the air quality in your home be improved?

5. Smoke Alarm Activation

Have you ever found yourself frantically waving a tea towel under a smoke alarm when someone's cooking?

6. Unwanted Condensation

Have you ever found yourself opening windows to clear unwanted condensation after cooking?

7. Noise Avoidance

Do you avoid using your rangehood because it is too noisy?

8. Noise Sensitivity

Are you or is anyone you know sensitive to noise or smells?

9. Opening Windows for Fresh Air

Have you ever had to open windows and air out your home to remove lingering steam, smoke or food odours?

10. Power Inefficiency

Have you ever not used your rangehood because it is not powerful enough to make a difference?

At the heart of a luxury kitchen there's not just great design—but comfort, ambience and practicality.

Amore premium rangehoods combine whisper-quiet operation with powerful air extraction, ensuring your space remains calm, fresh and clean after every cooked meal.

*“Some recipes are more than just ingredients
— they’re stories, love and legacy passed
down through generations. Don’t let noise
drown out the moments that matter.*

*With Amore quiet rangehoods, keep the
tradition and the conversation, alive.”*
